Book explores fuel issues for engineers

Monday, June 2, 2008

[Penn State Live](#) ^[1]

OBruce G. Miller, associate director, EMS Energy Institute, and David A. Tillman, chief engineer of fuels and combustion, Foster Wheeler NA, are the co-editors of "[Combustion Engineering Issues for Solid Fuel Systems](#)" ^[2], published by Elsevier.

The book combines modeling, policy/regulation and fuel properties with cutting edge breakthroughs in solid fuel combustion for electricity generation and industrial applications. This book moves beyond theory to provide readers with real-life experiences and tips for addressing the various technical, operational and regulatory issues that are associated with the use of fuels.
