PA Home Energy promotes home energy audits on WTAJ-TV news

A two-part segment airing on WTAJ-TV Channel 10 news at 11 p.m. tonight and Tuesday night will follow PA Home Energy service providers as they perform an energy audit on the home of David and Jennifer Johnson of Phillipsburg. An energy audit is a series of diagnostic tests performed in and around the home to find and address energy inefficiencies. The broadcast will explore what homeowners can expect during an energy audit and how home energy use can be reduced while improving its comfort and safety. If you own a home or are building or buying new, learn what you can do to save energy and money at home. Savings of 20 to 30 percent is possible on new and existing homes.

PA Home Energy is supported in part by West Penn Power Sustainable Energy Fund, which is managed by Penn State through the EMS Energy Institute.
