Assistant Professor's Research Televised in Australia

Wednesday, April 7, 2010

Earthquakes

Demian Saffer, assistant professor, Geosciences, and several other researchers were recently interviewed for a mainstream science show broadcast in Australia. The episode looked at the scientific fault zone drilling that took place last year in the Nankai Trough in the southern seas of Japan. The show, *Catalyst*, is much like the shows on our Discovery channel and covers science discoveries and breakthrough from Australia and around the world.
