Boehman's research highlighted in video

Monday, February 7, 2011

Dr. André Boehman, professor of fuel science, was the subject of a short video to highlight his research on alternate sources of diesel fuel. Boehman's work was one of five energy related research areas the University chose to highlight during the broadcast of President Obama's speech on Thursday February 3, 2011.

In the video, filmed in his diesel combustion and emissions lab, Boehman discusses how his research team's work is relevant to the President's initiatives to increase the use of renewable fuels, displace petroleum, and improve efficiency through innovative research.
