## Funded Projects\*

Advanced Decline Curve Model for Stripper Well Production Analysis (METEOR)

*Advanced Resources International, Inc.*

Analysis of the Taylorstown Injectivity Problem

*Penn State University*

Analysis of the Wileyville Waterflood

*Penn State University*

Applying and Developing New Approaches for Maximizing Recovery in the Barnett Shale Gas Play: From Understanding Capillary Forces to Improving EUR's

*Republic Energy, Inc.*

Chamber Lift: A Technology for Producing Stripper Oil Wells

*Penn State University*

Design, Development and In Well Testing of a Gas Operated Automatic Lift Pump

*Brandywine Energy and Development Co., Inc.*

Developing Methods to Identify Unstimulated and/or Ineffectively Stimulated Reservoirs Resulting from Multi-Stage Hydraulic Fracture Treatments

*Schlumberger Holditch-Reservoir Technologies, Inc.*

Development of Diagnostic Techniques to Identify Bypassed Gas Reserves and Badly Damaged Productive Zones in Gas Stripper Wells in Rocky Mountain Laramide Basins

*Innovative Discovery Technologies*

Environmental and Regulatory Issues Relating to the Utilization of Recycled Produced Water from Oil and Gas Operations:

1: A Study of Existing Policies of State and Federal Agencies

2: Development of an Approved Program for Re-Use of Water

*Texas A&M University*

Identification of Effective Fluid Removal Technologies for Stripper Wells

*James Engineering*

New Technologies for Lifting Liquids from Natural Gas Wells

*Colorado School of Mines*

On-Site Treatment of Brine

*Hart Resource Technologies*

Optimization of Plunger Lift Performance in Stripper Gas Wells

*Colorado School of Mines*

\***Note:** A one-page Executive Summary for each of these projects can be downloaded from the SWC website.
